HUMAN RESOURCES DEPARTMENT

EMPLOYMENT OPPORTUNITY

SONAR TECHNICIAN

The Job:

Reporting to the Fish and Wildlife Manager and working with the Department of Fisheries and Oceans (DFO) staff on all daily aspects of sonar and camp operations. Test fishing for salmon and other freshwater fish to take measurements and release. Be able to carry out regular camp maintenance such as generators and basic construction. Work within all VGG Occupational Health and Safety best practices.

Experience:

The successful candidate will be comfortable in boats/on the water and outdoors in general. Have interest in learning new computer programs to count salmon on sonar files. Basic mechanical or carpentry skills or interest in learning. Ability to assist with manual labour including weight from 25-50 kg and assist with periods of strenuous physical work as required by project work. Experience working in areas inhabited by bears. Basic first aid and swiftwater rescue certification are an asset. Training can be provided.

Project Hours and Term:

37.5 hours each week (7.5 hours each day), throughout the summer and fall 2022
